## About Me

I'm a Web Developer with an Electronics Engineering background from Bengaluru, India. My journey through IT, telecommunications, and security systems has given me a unique problem-solving perspective that I now apply to crafting exceptional digital experiences.

What drives me? Transforming ideas into functional, beautiful websites. I specialize in:

- Building **WordPress websites** (business, portfolio, e-commerce) with custom themes and plugins
- Creating responsive sites using **Elementor, WP Bakery, Divi**, or custom **HTML/CSS/JavaScript**
- Converting designs from **Figma, Adobe XD, or PSD** into pixel-perfect websites
- Optimizing, migrating, and breathing new life into existing websites

Beyond development, I handle the full lifecycle – from hosting setup to seamless server migrations. Whether you need a new website or want to improve your current one, I'm here to help.

Let's create something great together! I'm available for both full-time roles and freelance projects.

- E-Commerce Development
- Plugins Development

## Page Builders

- Elementor
- Divi
- WP Bakery
- Gutenberg

## Hosting Platform Expertise

- Namecheap
- Hostinger
- GoDaddy
- WP Engine
- Siteground

## Development from Design

- Figma
- Zeplin
- AdobeXD
- PSD

## Version Control

- Git
- GitHub
- GitLab

# Experience
